

IBRAHIM MAMMADOV

AI Engineer | Generative AI & Data Analytics

Location: Krakow, Poland | **Phone:** +48 503 771 591 | **Email:** ibrahimmammadovpl@gmail.com | **GitHub:** github.com/Ibrahim-Mammadov

PROFESSIONAL SUMMARY

Analytical and solution-oriented **AI Engineer & Data Analyst** with experience combining Python-driven data analytics with enterprise **Generative AI solutions** on **AWS Bedrock**. Skilled in designing **RAG (Retrieval-Augmented Generation)** pipelines, integrating foundation models (Claude, Titan) with enterprise knowledge bases, and building scalable REST APIs. Proven expertise at Cognizant analyzing complex data streams with 99.7% accuracy while leveraging Python for automated data validation and workflow optimization. Backed by solid cloud infrastructure and CI/CD hands-on experience.

TECHNICAL SKILLS

Generative AI & LLMs:	AWS Bedrock, Claude Models, Amazon Titan, RAG Architecture, LangChain, LangGraph, Prompt Engineering, Enterprise Knowledge Bases
Vector DBs & Search:	Amazon OpenSearch, FAISS, Pinecone, Semantic Search, Vector Embeddings
Data Analytics & Tools:	Python (Pandas, NumPy, Matplotlib), SQL, Data Cleaning & Preprocessing, EDA, KPI/SLA Metrics Tracking, Data Validation
Cloud & DevOps:	AWS (Lambda, API Gateway, S3, CloudWatch, SNS, ECS/EKS), REST APIs (FastAPI), Terraform (IaC), Git, Docker, CI/CD Pipelines

PROFESSIONAL EXPERIENCE

Cognizant Technology Solutions — Data Analyst / Process Executive

Jan 2023 – Present

Krakow, Poland

- Analyzed large-scale operational and transactional dataset evaluation workflows, consistently achieving **99.7% data accuracy** under strict SLA benchmarks.
- Developed **Python scripts (Pandas/NumPy)** and automated SQL queries for data cleaning, transformation, and anomaly detection, reducing manual audit time by 35%.
- Engineered automated validation pipelines to verify data integrity before reporting to senior stakeholders.
- Monitored team performance metrics and KPIs, presenting actionable operational insights to drive cross-functional process optimization.

FEATURED AI & ENGINEERING PROJECTS

Enterprise Knowledge Base & RAG Assistant (AWS Bedrock)

- Designed and deployed an intelligent enterprise document-querying RAG assistant using **AWS Bedrock**, **Claude 3 models**, and **LangChain**.
- Integrated **Amazon OpenSearch** and **FAISS** vector databases for semantic chunking and embedding storage, allowing real-time context retrieval over structured and unstructured company documentation.
- Built production-ready **REST APIs (FastAPI & AWS Lambda)** to serve model predictions with response latency optimized through advanced prompt engineering.
- Automated full infrastructure deployment using **Terraform** and configured continuous delivery pipelines via **GitHub Actions**.

Automated CI/CD Pipeline for ML/AI Microservices

- Built a Dockerized continuous integration/deployment pipeline using **GitHub Actions** for AI backend microservices.
- Implemented automated testing, code quality checks, and deployment triggers to AWS container registry and execution environments.

Real-Time CloudWatch Monitoring & Alerting System

- Established automated CloudWatch alarm workflows connected to Amazon SNS and PagerDuty for monitoring LLM API endpoint availability, latency, and error rates.

EDUCATION

Master's Degree in International Business <i>WSB University — Krakow, Poland</i>	2022 – 2024
Bachelor's Degree in Fine Arts <i>Azerbaijan State Pedagogical University — Baku, Azerbaijan</i>	2017 – 2021

CERTIFICATIONS & TRAININGS

- **AWS Certified Cloud Practitioner (CLF-C02)**
- **AWS Cloud Practitioner Essentials**
- **Datacom Introduction to Cloud Job Simulation — Forage (2026)**
- **Citi ICG Technology Software Development Job Simulation — Forage (2026)**
